

2024 Cohort Theme | Climate & Nature

6 high-potential pathways identified in line with PAA's anchor mandates

1 Energy & Power

- Reduced upstream emissions
- Renewable / Bioenergy
- Clean fuels
- Energy efficiency

2 Food & Land Conservation

- Sustainable agriculture
- Reduced food loss and waste
- Alternative / plant proteins
- Tech-based forest and coastal management

3 Oceans Conservation

- Sustainable fishing and aquaculture
- Reduced marine and water pollution
- Prevention of wildlife trafficking and invasive foreign species

4 Circularity & Waste

- Circular business models
- Sustainable materials and packaging (e.g., plastic alternatives)
- Waste management systems (e.g., recycling)
- Optimised material use

5 Cities & Settlements

- Urban planning
- Food security
- Disaster relief and preparedness
- Climate-safe housing and transport

6 Enabling the Transition

- Re-skilling and continuing education
- SME transition support
- Climate finance (e.g., insurance, trading platforms)
- Climate analytics, accounting, reporting
